Abraham Brothman

Met at time of Sam Mova - Louis
fight - recall listening to it in
Brothman's car at one of their very
early meetings.

First meeting in 1st Ab. - (3 days name)
Painfully - by passing on with
Sam - gave H. license of Dr. car
which had an "N" in it. Sam
in Sam's dict., but Dr. of Penn.
Sta. off 7th Ab. - in the 20's -
the night he saw him he had Sam
Mova - Louis fight. Thinks that
Dr. mentioned "Helen" or woman
he had for. got into the car - and
was a subterfuge to Cold, Orig.
met Dr. through use of a password.
Never mention the name Cold, but
did mention a man in connection
with "Helen", ~~also mentioned~~
who frequented Helen by many years.
Man would be Antony, was an Amer. &
was a personal friend of Brothman -
had no connection with Helen. Had
a unusual name - believe it began

- 2 -

"K"

with an "S" - may have been an Armenian name.

Sam told H. that since it was a Clinit, he could talk some long, and Br. & I would get along with Br. much better than person who was contacting Br. at that time. So H. would get info. from Br. Sam did not anticipate the difficulty of getting info from Br. - last minute switch of info by Br. just before meeting - fragmenting process. Sam used to lecture H. that he should get whole process, dose, duration, everything. Br.'s reports were very incomplete.

Golov -

Grand memorial day - was 1st time Br. ever mentioned the name of Golov, and the 1st difficulty in pronouncing it. "Golush". Picture is a restaurant. Does not believe Shuman & O'Brien he could see they walked into together, certainly they didn't know anything about Golov.

"Must be that bitch Helen - You're got to cover me up - we're

H. knew that Br. was not referring
to Sam. If not at that time
then that night, after Agent Smith
with H, H told Br. he did not
know Calow. Br. described the picture
of Calow Agent showed Br. - build
dear. Slim - small nose, reddish
hair, bald nose.

When H. said he didn't know Calow,
Br. said exactly like - it's far
late now, you're really got to
stick by this story. That night on
the 11th night - after the 11th
P.M. after - Moore was in car -
Br. was extremely little - with the
fact that in some fashion, Tom
Blade was the man mentioned behind
the whole business - of all all the
business. Br. and Agent had asked

During a Harry Silvermaster - asked
H. if he (H.) was not the owner of
Harry Silvermaster - H. said, Mr. B.
thought that Black had probably used
the name.

Bl. had come up to Dr. Tab-

Dr. ~~friend~~ of Bl. came with

close friendship with Duke Hank

Bl. was behind a head of white

That night in restaurant (dinner of
China Town, Pogo Park, Green) -
H. told him came with Agat &

being in this. - H. was

Night before G.S. - July 30 - ~~at~~

 on Skillman Ave - 3:30 - 4 AM -
 Dr. told H. ~~all~~ of his G.S. history -
 that John Calhoun was ~~was~~ ~~was~~

With ref. to H's test, H told Bn. exactly
 as he had told Agent. One line -
 H sd. met Cal - 1941 + H. sd.
 1946 - Dr. sd. well - that is a
 minor case. Since, Paul Kessler
 agreed that exper. of H was a good one
 since. Under a weak point. Bn.

 H had to care of for him, but when

Hendrick

Is in Gold's H.W.

say this probably refer to a very early fragment (blue print - isolated) "H" probably refer to Hendrick Mfg. Co. Undoubtedly was material which came from Brathman, while he was with Hendrick.

May have been part of a batch of mixing equipment (blue prints) which Brathman gave Gold.

The attached is rough draft of a report which would explain the blue print which was to be turned over to Sam.

Possible date - from 1st time Gold met Brathman to 5/42 when Brath. left Hendrick.

'Benesse Pen' - Gold def. recalls that Slack ~~gave~~ lent him book because Gold had long coach ride from Rochester - possible that Mr. S. lent it to him. Possible that Gold received book from Slack at Kingsport, Tenn. - (the date in the book 7/13).

P. 83 - Gold says this doesn't mean anything to him, although the observation is true (black absorbs light). Not his handwriting. No idea who "Carl" is, unless it is addressed to the author of the book.

P. 197 - Doesn't mean anything to Gold -

all refer to film, etc. (Gold).

Sub Conference Reports (Typed)

Handwritten notations appear to be in
Black's handwriting - not sure though.

Note that handwriting gives the identity of
chemical referred to by number or name
(page Gold). Also identifies abbreviations.
("vso" - very small pieces).

It is possible, page Gold, that these
conference reports are where code number
of chemicals are identified and referred to
by Gold, in rough draft of report to
Sam (which was found by F.B.I. in
Gold's residence).

Explanation of why in possession of Gold -
Conf. reports refer to minor charges both of
an experimental and permanent nature.
Processes for prep. of various type film.
Undoubtedly Black gave them to Gold for
transmittal to Sam - anything Black gave
him of this nature was for transmittal to
Sam - Can't explain why he still

Then Hem. - Possibilities (Guesse).

① But one - Black later got more up-to-date processes which were better than those covered in carbonyl ref. (note that ref. dated in mid 30's).

② That Black was to do some more work on them as explanation of what it was could be given to Sam.

NOTE - Gold never, never discussed any material he was giving Sam, at time of delivery, by taking the stuff out of packages and giving out it.

Typed page - probably typed by Black
for benefit of Gold and/or Sam
Gold said it should be first

Gold said all papers in this

Bald said this definitely refers to Slack — in in Bald's HW. Says doubt he knew Slack in '40, so explains the date of 9/40 as follows:

① He actually knew Slack then

② The date refers to material given by Slack to Bald's predecessor who turned it over to Sam, so Sam was merely referring to something he already got, but from intermediary who provided Bald

Bald says he is almost positive that this was written when receiving instructions from Sam, or to what should be obtained from Slack, if possible.

Bald said to find out the date of the Jon Nova Joe Louis fight and that would be about time Bald met Brothman. If the fight was in 1940,

6-11-50

65-4307-1-B-5(5)

Bald does not recall ever having seen this, but says ~~it~~ there are 2 possibilities.

① Slack gave it to him, but Bald forgot to turn it over to Sam.

② Slack wanted to show Bald the possibility of using Kodachrome in aerial photography.

Bald says it's obvious that it was recovered from waste as it was cut ~~from~~ with paper cutter (Bald did not cut it up). Sl. that probably he was supposed to put it together but never did get around to it.

③ Bald said that it is possible that Slack may have later given Bald better samples which were turned over to Sam, so Bald kept the cut photo.

G. S. Miller

Addendum - Bald recalls that Sam had exhibited an interest in the possibility of using Kodachrome in aerial photography.

Completely in Gold's H.U.

Is undoubtedly a report on above, which
Bruthman was working on at Chemurgy.
Is design material. Printing on page
3 is not Gold's - possibly Bruthman's.

Purpose of writing this report was
for eventual submission to Sam, but
was never turned over because when
Sam found out that it was
Bruthman's work, he didn't want it.

Fact that it is on lined paper leads Gold
to believe that it was written in
Bruthman's presence (Gold said he never

reports for Sam.

① Conv. between Br. & Gold interviews. - the

The FBI knew - they know everything - They know all about us - they know you was a courier - they have photographs of you and me together. Look - we don't have much time - Look Harry, you've got to get this straight - you've got to tell the same story & told about how we met. Look, did you know this guy John. H. felt that it was not John. Br. was referring to. H. thought he said - No, what was he like. Br. - Look, Harry, you've got to get this damn straight. Please, please show by letter to Br. of John. "Small, wizened and old, reddish hair, with receding hair line. Do you get that - H. said "I did" Look, you've got to make up some sort of story, forget away or to him you met this man - remember - you've got to say John introduced you to me. Look, I tell you that John was a little bastard - a prostitute or that you & I would together for him, with you evaluating

Chemical processes. H ~~don't~~ H
asked him FBI or get photo of
H & Br. Br - I don't know, they
got 'em - a lot of them - photos
of everybody. About the middle
of com. - Br. said - "someone has
ratted - it must be that
bitch Helen." Br. also said
during the com - then follow out there
are going to see you - they may be
on their way out there the com. I
promised them I would not talk
with you, so don't let on that
we've talked about this. (H going
to Br. this way, were perfectly innocent.
Another statement? You've got to
cover me up and tell the same
story that I told.

Br. finally flushed H out
of office - full report had just
hit H & he wanted to talk quickly
about it.

H went to lab - ~~was~~ in
way out thought of Carter Hadden
& made the story up mentally.
Had momentary confusion as to story

CHE man, but put aside a
hook and to see some of
his person.

~~After going to bed.~~

Apr 9 ~ 9:30, Br. & Mark come out
to bed - my hair curled for a
see if SA's gone - can't recall.
Went to eat at "Sunny's of Chinatown",
on Q's Blvd, Reg. Park - 3 of
them went in Br's car.

Br. must have checked the window to
know how H. had carried off cover.
Mark accused Br. that H. had acted
extremely nervous (Mark present
when SA's arrived). H. didn't really
tell Br. much in Mark's presence.
Later in bed - Br. - "Look, H. - I've
got to know all about you. What
are they build and what you
that I don't know - I've got to
know all about you. H. told
Br. that in reality I had seen
him married. I really, Br. was
still alive. - I will see for sure.

Had my recrimination for being
told these tales, but by the way,
did not think they would be too
serious. H. had had no chance
for his in the line story. - Br.
made H. go on in detail story
H. told of C. H. and Cle
Don & meeting below. Have
the describing letter of 1940
when H. and he last below at the
year 1940 when Br. gave me your H.
met Br. with in. Br. tried
to brush it off - "What the hell,
you can make a mistake of a
year - your memory's bad. Br.
seemed convinced that H. was
true engaged in other activities in
H's area with the Soviets, other
than Br. - from I suspect only
that he would be involved some
of Br.'s area, with H. H. seemed
Br. that in Br. in H. knew, so on
him forgetting of H's activities - &
that it would be a good thing not
to refer to that in front of anyone,
especially Rocky (Cunningham).

No conv. abt what H's other
activities were.

Frank Kessler - H told Br. that H's
was one of F.K. was bothering
him - they were close to get
tired that's all Kessler - knew it
that was only. H. was having
the idea of F.K. because of fear of the
Reich.

No conv. re: Sam & Lucile a design with
Anthony.

Br. brought up story of Hine called in
writing book on chem processes -
that was made up story - H. Lohman
used that story - Br. ad. H. was for our
own - from a story by Br.

Rest of conv. to great extent - down with
other names who Shannon & O'Brien -
Harry Silvermaster (was it him?) - can't
recall others, but it seems to me
all names in reference resulting from
C. I. procedure was: Elly Bentley -
also told H. if he was one of the
other names mentioned by Agels.

C -

13. told off very little of B. story to
SA's.

In Restaurant - Opening statement - an
apology for Br. - "H, you don't blame
me for being brought you name into
this - I thought since they (FBI) would
eventually uncover you - that to
allow such - would be better for
me to bring you in myself and
at the very beginning!" (Refuted
later on just before test. (14) before

that Bl. had found exceedingly un-

now been released.

H. objected to this for the point that
H. ad. Br. was exceedingly ungrateful

③ from paying by Dr.

④ (Most likely) something H. did back when it was extremely weary, e.g. when H. had worked for some days in succession at that with any sleep whatever.

This was in early Aug. of 1946 when Dr. asked H. what was the name of the man whom H. had that info on atomic energy. H. told Dr. it was lost and for him to have Dr. the info. - I don't know, I was not paying, I was so all I went to know, was he an atom. H. - No, but perhaps ought to be clear on an Englishman. Dr. said, "Was it Klaus Fuchs?" H. may have mentioned the name K.F. first Dr. then told H. that there had been a small party in the early H. T. orib. of approx. 7/27 or 29/46, saying that Dr. K.F. was held up for 3 in England. H. said that if this was so, it was certain that the man H. knew would not talk. It was well as being done. He said with me to Dr. again, except on one other occasion. He later in the fall of 46, when Dr., after a social meeting with the Bernard Kaufman, he claimed bitterly about how the Kaufman had been so critical of Fuchs being involved in a sub. activity. Dr. said that Dr. had not confided to Kaufman, but was extremely upset by his harsh attitude toward Fuchs. He

believe also that at the time
Hany has asked Br. whether K.
was here & friendly, but H
only would reply. It was
to add. as being to S/YC com.
that is, when H mentioned Frank
more, that Br. indicated & ad-
vised to know of him, though
his name was not published.

Br. indicated as joke in com-
munity K's criticism of F. - that
is joining F. with name, he
had killed it Fucks, but
presumed it correctly.

this is all that was con-
sidered about Br. & H. vs.
K.F.

H did not tell Br. when H
was doing the info on atomic energy,
but ^{intentionally} got it from SW -
H may have previously told Br. that H
had been in the SW & per Br.
wanted to know if H got info in
SW.

May have let drop fact that
H alt. info on atomic energy from
S/YC com. with Br. - after S/YC when

Re: B. B. - such matter

H. tends to like people with some chi-
like lean - too much of a forgiving
nature - B. had very intense childhood -
H. can understand what B. does B.
to conduct him. & like the way he did.

F-B. affair - isolated incident -
even when he thought it short time ago
he wanted to tell in because it was
so dissonant with rest of story - but it is
true.

Karson def. into a Comm. - single in-
cident - 12r told H. he (B.) had
been C.P. member in D.C. abt 1938 or 1939.
Mostly a Comm. H. met Karson thru
B. back in K's glory. - B. B. had been
beaten up by Matt. Goldman trying to
distill literature - written in the 30's -
maybe with much Y.C.L.

Was allowed to finish Marxist pamphlet - was
sympath. and C.P. alien D. was kicked
out. Abt 1948 - was of the way the C.P.
was being run. H. would not want him
back. B. told a lot of ple
during state of rebellion, etc.

^{Heller}
Fred Heller, aka Ferdinand Heller -

met at H to see Bl. in January 1933.
Heller was sentenced to Bl. at Penn. State
was charged at Penn. State - did
work on "under Oct-11/33" - found
fr. of Bl.

Good work at Univ of Va.

cut well when sent there.

Am. Chem. Paint Co., at Ambler, Pa.
as of the middle of late 30's. as
a sales rep. & service rep. - may
have been a chemist for the org.

H. saw him last about 1934 before
he went to Xania. May have seen
him in 1940 through his Xania.

Bl. always brushed H's inquiries about
Heller aside. H. suspected that Bl. may
have tried to get away from Heller
for some reason or other. Heller
nevertheless didn't know - REASON - some-
thing Bl. might have said to H.

Trouble with woman in Billings and
St. Bl. drifted there.

Tom referred to him as FERN (prob. a
corruption for Ferdinand).

Believe Bl. believed that F. named woman

F's mother & father - lived at
199 West Chen St (1931-33) - owned
Kaiser's home. H. there once.

H. only with both of them 3 times.

Trips -

Went to Hong Kong summer of '49. Bl.
sent a package containing film (photo.) to
Fred Heller in Switzerland - at 9th
St. P.O. (Mabel St.). Was there on bus.
for an hour. Sent P.O. Bl. questioned
about it and looking him to buy the
film. H. told the film was seen by
H. before it was mailed - pretty sure
they mailed on Bl. about it & it was
unreel film.

H.

Heller had a married sister - she married

Heller was like Bl., at college, a
socialist - something strange in H. in
mind of seeing Bl. and Heller in secret
valley together at time H. left
Holland - Heller came to New York,
picked up H. in G.O. & they went
on to Summit Valley to see one of
Heller's girl friends. She someone

Thos. T. Black -

B. Bl's father was great ad. of great 9th
port Tasso. Bl. had more ch'd
in J. C. Jeth. Prof. of Eng. Lit. at
Bloomington, Ill. Coll.

At Penn. St. Heller & Bl. got out
in London.

Bl's 1st job

Am. Cyanamid Co., at Dy. Co. J. also
1927-28 While here at Platts

refuse com. Bl. to Comm. in
Jellor's name was David

a chemist, who was fired in '38-'39 -
some mistake made in plant - had
to have goat.

To Holbrook, the Naper (a few ad.)

Prof. H. told H. one time, Bl. had been
deserted in house, from a time H. met
Bl. who was about 1000 ft. in
room or day as H. knew him.

Named from after Friedrich Engels. "Freddie".

One thing about Bl's esp. activity, but H. forgot
now, but was on the sound scribe - did
not have time.

One time or another Bl. trying to get into
Heller - a most promising confound (the El
Dante) - Heller had saved it up - Bl. was pretty
indigent - was about 1000 ft. in
above

Bl. had given it to (Soviet) - Bl. told H - Soviet came back & said to Bl - "What the hell are you trying to give us?" Bl. said he had turned it directly over to the Soviet info looking at it. Bl. seemed to think that it was due to Heller's carelessness. This happened sometime in 1940 (if Bl. was beamed in 1938).

Bl. sd. that Heller knew that Bl. had visited H in industrial esp. & that Heller was featuring him (Bl.) with matter which Heller thought would be valuable to S. U. Bl. has told H that "you know how the brother we shot voluntarily info - they like to select their own winner".

H's Code - believe whenever a source of info was uncovered, H doubts that person discussing him, or his Soviet contact ever worked with that person. (If Heller were recruited - H doubts it - Bl. probably didn't handle him). Bl. undoubtedly must have written a background story on Fred H. - in giving it, he must have stressed Heller's cover story in regard to work - source, like that would come part off the Soviet.

"The Brothers" - a term developed by Bl. & H, also referring to the Soviets

Dec 9. because of forbidden meeting
between Bl. & Harry.

Bl. & H. after talked about 2 things

① That study around 1940 or so
Bl. said an increasing dislike for the
work - brought only 2 incidents

② Faculty to Bus.

③ Univ. of Pa.

④ Winter trip to Kettle - would on
st. cov. for guy who was should ch -
was him directly.

Bl. told H. if in H's mind, H. should
be run across any 'useful info' which
a collection of people could use for the
[Clegg?], make a note of it. Such might be sent
on or so we could never get job,
and would have to go in business
for themselves.

Disc. H's going up to Ghr's (to work
for her) - 146 - Bl. thought it would be
OK - also H. had told Bl. that
H. was really of pulling this whole bus-
ness getting in too deep.

At dinner, when Bl. & H. would
be extremely wrong, Bl. would get
very depressed - would tell H.
that eventually they would act. would
be disclosed - in that way. 'I am -
twin the least little trivial incident
which you hint could result
in your apprehension. Bl. would often,
when tired, & H. told him to get
more rest - Bl. would say - 'I am
and wait for you and I. H. will

come when you and I are in the grove -
most but usual attitude.

Bl. after couple, about Belle coming
to Bl's apt. in Newark.

H. went to lunch 132. - 56-57 - with
Pl's wife & Hapco - Bl. used a get
for behind - as a reason for their
forbidden meetings.

40-46 - H. saw Bl. very seldom -
H. saw Tim got off train at Newark
on NY tracks & gave 132. a call -
had visited tel. - may have called
see Tim from N.Y. Told H. but
visited place to help father from
Columbia Union.

46-48 - still didn't see Bl. very much -
H. bought 132. to give several times -

48 - on - saw 132. quite often & would
call 132. up at very very seldom.

H. believed that 132. did look at & if he
did, it was because they dropped him. -
may have been caused by Charles Dinkins
saw him in '36 or '37 - Bl. & H. took
room at Central Hotel & had false noses -
didn't wear - spent day & 1/2 - sat out
late sun. & saw some aluminum
alloy & angle iron (studs) - drilling holes
in them, for assembly into a small
rect. ^{after making a figure} ~~square~~ ^{device} ~~for~~ ^{for} welding ladder rungs.
Didn't have lamp. Tom asked Harry to
help him on this - was in the summer -
which before 132. got in Toronto, then

never from anything about it. Almost finished - Bl. C. complete it. Warrant about about slawings. Bl. bought a cube of Driller, hand saw & every thing so about could work. Can cut 30" long, x 8" x 16". Bl. had measurement & everything. Bl. really said it was a portable altar - might for making hidden things - use of a definite purpose & use.

A year previous to time Bl. gave up his apt. in Newark - was at time Bl. probably drilled out with barrel - but old. Because that was only way barrel had to get in & barrel with Bl. - then Bl. was at last contacted at time after then ??? - so Bl. is stated the barrel end cut him in Phila.

One thing that always bothered Bl. was Charles - Harold Bl. & Ch. from Bl. ^{Notes} he had "get to be known above & live down."

that his sister in Boston was considering
separating from her husband. Was having
great diff. She was thinking of coming
to N.Y.

He would like to see her
live with her & the children. H. believed
in her & for H's approval. - H. told

F he could talk it up with H's
sister (a meeting with F left
for her alone). She did - at

next meeting told F he had taken
the matter up & it was OK. H

could readily see he was absorbed
by the work & children. H. thought

this was pretty smart of him to
take it up. H. took it for self. - because

Despite this meeting when they ate at Raulen's & many things F stuck to business & not idle gossip - saying F related to H; H related it to J.

I believe H gave F a brief outline - H told him it was a memorandum - F not too likely about it - and about 4.

Sl. came back very excited & showed

the U.S. has been attacked by Japan?"
Put Sl. on train.

Jennie Ruziblat^{about 17} - had a son Frank,
who may have been an uncle, who

Came about - H.G. meeting with
her - late '42 - maybe Jan '43 (at
Linden Hotel) - she told Ch. to expedite
his work for the Soviet - he would
be glad to provide strong help.

He is H couldn't think of what to get,
so finally got in touch with R. 132
who got this girl from Newark
(born in Canada). This was the first
girl still going to Catholic school -
wouldn't for state taken B.D. or
something.

Picked her up at Newark, then
she - go to Chen office with her.
On return it would get her in for a
Newark, as for it had, of course, to
over look to R & to see Chen. She
didn't know H had stolen, but it might
have told him that Br. got one.

Orig. meeting - in Newark - 132.
Told her to H. Pd her about \$10
for ring - came and H's pocket -
that H showed money from Bl. part of
time to pay her. - H didn't have
money - even pd at least to transfer
on evening, they did no work.

She didn't even get curious -
she had some sort of fear that it
was not to make her - the Bl.
told him to be careful with her.
May have interested to her that it was
normal.

H still owed her for 100 & 100,
which he doubled her, but was destitute.

Br. didn't ask any ? about her cause
it was obvious she was too smart, etc.

Taped quite a bit - recorded it to
H - me + turned it over to her
cause B. didn't want it.

Plan #29 - Report - letter from MIT. (H's Hw).

Remember a time when H was even going to MIT - must have written it for Fred. - when H thought of order of going to school that Fred must have said - only one place - that is MIT - H. did not want to go there. H didn't have the money to go to MIT. Reason for writing, cost of MIT - was at Fred's request - to show Fred why he couldn't go - Fred told him to go to MIT & don't worry about the cost. H. sd he couldn't consider it - may have used the old excuse - H diff. abbl. to parents when much longer came from.

H think he had the letter, but didn't want to give them to Fred. - right had some reason for sending H to MIT.

The 4/10/38. - was actually 1/29 when dated P.S. - so that it is why this page was discarded - this 1st page - supposed to be a first draft.

(3) "my father & brother - Morris Ruchman in - Chas E. - M.S. on form. Ph.D. from MIT - was young man (24 or 25 then) Fred had tried his hardest to get involved in Co. working at MIT - Morris ltr P.S. & sent it to father & brother had read. Some as father also with the yard.

(4) 4/5/38 - this was a letter H had & used as letter in writing to Col. C. C. C. C.

H had decided to come to work for at least a while - C. C. C. C. would be to work & go to school at same time - every bit of his night school while - wrote P.S. to start on a Freshman.

The above stuff a MIT was written for
and about sometime during summer of
1938 while H still laid up from being
burned.

Possibility - reason for his funeral - but
that Mr. was quite likely about H and
having any concern in getting into Cinc. U.
& Federal to see H went about a
year before H got to school.

① Mr. called on H & MIT
& pay H \$5000.

② that H would cost to work
for Gov. for a year or so & work on
the PNY business.

When H told Mr. he was going to school
again, he was very bitter about it.

Concern a frozen unit can sold to NORCO -
containers each making process. Advantages
are listed.

① Increased out of April, &
flow from water to water.

② The saving in man materials due
to superheated water combined with
the excess of man materials.

③ The fact that the glycerine
(by-product) could be separated
easily, & was of a much higher
quality (by-product grade & better) than
that which was obtained by older "salt
out" process.

return forgetting to send school.
Br.'s son was - list - called after Brown
- Br. later than the war Brown the
stair. H. told Br. about any one

adventured by at Wright Field in
Dayton - I didn't give a damn -
this man had another money, but the
S. U. to put him there. He & I
+ later on ^{with} got in touch with
him, he refused to work with
us.

③ Very early in H-B. rel. - Br. rel. he
was very glad to see H. as he could
begin begin travelling into the
S. U. which was the only time fighting
again & passion.

④ 12th off'd. to get H. into a garden
plant, designed for the H. & Son Ranch
Co. - this occurred in about 2nd
week of Dec., 1941 - also second
Dec - blue pants beautifully
H. was meeting a + the place at Dulles,
other side, west side, across from
town's there - also 12/32 - week
day. ~~He~~ H. to give the
info to Sam in the subway -
4th st. - Nord. stop of 6th. on
line - a platform itself. It waited
so long for Sam, that it finally
took out, up to seeing Sam to
get the date - Sam had just got
on subway - went to next stop
up town - H. saw who he thought was
Sam - got in conversation - got
off next stop - Sam went down
H. to platform. Rain night -
H. wrote, etc. What. Sam took him

from his mail - probably at
 Henry's school (Henry's school Hotel.)

Right after the B. visit
 from 14 the date on B. was S +
 the other address was Bogalva

On 11/14, H. worked on B. for
 couple of hours to his satisfaction in
 B. was S. B. did come down - both
 down with - dropped to afternoon
 B. was S. Had nothing, then
 on 14 found out that B. had just
 begun to work on B. was S. (found
 out from B. himself.)

The found plant dead and not
 watered by B. as a result of B.'s
 disgust with earlier fragments which
 B. had tried to submit.

→ B. told H. briefly to ^{fill} ~~submit~~ ^{what} ~~submit~~ ^{black}
~~the~~ ~~from~~ ~~canon~~ ~~submit~~ ~~black~~
 submit. was going to have B. in

The found plant may have been
 in Chattanooga - for something B.
 had said.

Doesn't recall if any explanation B. might
 have given for not coming through with
 the found plant submit.

③ Gold records just sent in their case,
 B. mentions ~~from~~ ^{from} Miami life typed
 stuff up B. was S. B. was S. B. was S.
 to Gold. felt the case to be
 H. had a whole wall of stuff up
 to the B. was S. B. was S. H.
 had ~~the~~ ~~for~~ ~~by~~ ~~for~~ ~~that~~

④ In 1942 H. that they could get 13. stuff which I was. — p. 100
B. R. + L. and good on the whole
man. Moore and I have to study
it.

⑤ Before 12/41 (after Panda) H. C. B.
B. H. not forcing B. for info - didn't
want to take home - told B. that
he was being pursued for the same
B. B. had, with the rules also it
was to be a change of quarters B. had
been producing. Groggish - was
isolated during, on a point a
few 12/41, such as.

⑥ These things for a certain
reason.

⑦ Stubby box design for
a certain reason.

⑧ Groggish design for some
type work.

⑨ After B. had given B. 5 info
to give B. a glowing report (about a man on
6 miles later) on how ^{extremely} valuable the info
was and had been rec'd with great joy by
the engineers of the Soviet Union (as far
possibly "S. U." or "p. the side") -
could be covered, put to use because
it was so complete.

After delivery of B. 5 + when H. told
B. that he was 12. H. had B. 5, even.
So H. had told B. that H. - that
to all - some will take H's
plan (that tell B. the).

Travis' 1st meeting. - Rem.

⑥ Try to get Br. to do further work in sympathetic manner, particularly by having Br. person go into his car, or to have Br. go to work on coming day being

⑦ To build up his ego & desire to do work for the S.V. - by having him meet a newly arrived and "info official"

⑧ To keep Br. for the work he had done on Brown S. & the missing equipment

Br. didn't know just how much H's control, but was told that from him of material Br. had been turning over.

at this meeting, Sam made a slip & called H "Harry" in front of Br. - Br. noticed it. When moved in room - also saw similar. [Later, Br. told H that he had always and would see K K most interested and frustrated - the only way he could H. used - frustrated and L. H. incident, this probably took place while H & Br. were talking over the new info they were SA's were doing then.

H told H that the last time Br. knew that H also used name of Harry Gold, in addition of K. K. was in the Bill Meale Johnson V. - even that - not sure. Br. Simon Miller, of place in - situation. Sent.

On 12/12/44 he and Br. were going
to work for him - and he wanted
to clear up matter of his name -
"what do you think of it - Harry Gold
a F.O.K." sitting in chair and
33rd St - King (46). He is right
or near K.K. - he sd. you're wrong
it's K.C.

Once with Br. with H. Chang - at
late 43 or early 44. Br. asked if it is
him again at Antong. I sd. no, but
would make inquiries. Br. said
we should be able to get about him
on organ. very similar to that which
he found at BH would become - all
sorts of sympathy & good inquiries.
And he a small organ devoted
to the work of developing plants from
legit & already ~~found~~ ~~with~~ for
the S. U., with very little profit
for himself - sd. he wanted power
designs made from him away.

Aft. Br. visit. A.O.A. - Br. appeared
14 times - before he went to work for
Br. (later 10/44 and 10/45). Once
at Ant, possibly twice. Substantive
was seen - trying to get some R. with
them Br.'s ways.

Only ref. to "John" that H. can recall
was early in ~~the~~ the action - Br. asked
H. how John was. H. sd. OK, but didn't
know she was. Another time, Br.
made the statement that he had gotten
along OK with John, but must wait

Helen,

As a result of one of the things, either
B. being distributed to me, getting some
work (digit), or as an agreement B.
was in trying to get H. to go to Antang
on return business, Ben. told of
a personal friend of B.'s who had
been long back to Antang, who worked as
a clerk at Antang, - an Amer. of
American extraction. H. believed that
he had some connection with B., at
least with the Smith, but not
much more, which leaves him for
believe this.

Just before last visit to Dayton, I learned that if H. wanted any help from S, that Sam could send along "a couple of dollars" to H.

Sam
Once told H. he had been to Ben ^{Mondan's} ~~Master~~ Rivers & one of place told him that he would do anything for the S.C., because they are fighting anti-Semitism. Most could money to Sam. This is date 42, but more likely '43. H. has idea that Sam took some visiting celebrity there.

Paul

35 - 40 - closer to 40. - older than any of the ~~men~~ Smiths H. dealt with. Petersen mixed family hell - BSE. may have told the name of Paul by which it has been known. Very familiar with NYC.

Shirley

Recalls that John told him that should Sam's not be there, the wife would have an envelope for him & if she indicated they needed money, leave the money with her. Also that wife was just as reliable as Shirley. Also that arrangements could be made for future meeting with S., through the wife. Name given was Julius - seemed to recall the Julius was an uncle or in-law of her, or possibly a uncle of her. Does not recall either a last name was given to him. H's idea was that when they (b's) were going back to England.

Noted at Belle (Shipport). Young fellow - about 24 or 25. (1942-43). Was mature in his outlook on life. Noted with Erickson. Then G., Black met Humbel. at a beer party. Black was much impressed on maturity of H., not outlook on life, as compared with G. Was a plant operator, but was ambitious to become a full fledged Chemist. Black thought the H. would be a much better contact at Belle than G., as Black thought that the judgment use of many vials produce results; as H. seem to know more of what was going on at Belle, than did Erickson. Thinks that Sl. only talked with Ed on time about H. felt might have brought H. up to Sl. while latter was in Kingsport. Believes that G. & H. have ended the.
